Introduction

During my career, I used mostly JavaScript (TypeScript), C++, Python, and PHP (with MySQL). I also had some experience with Kotlin, Java, and C#. I think I don't have trouble changing tools like languages, frameworks, and libraries, and I always try to adapt to specific project demands to get things done the best way possible. I'm keen on asking questions and inspiring thoughtful dialog.

Work experience

September 2018 – now

Siili Solutions (Software Engineer)
- modern car cockpit display: issues analysis and fixing
  (Kanzi Studio, C++, internal tools)
- Qt GUI analytics library: https://auto.siili.com/our-work-hmi-analytics
  (C++, Qt, QML)
- front-end for application optimizing plow routes with access roles and localization
  (TypeScript, React, Redux, rxjs, styled-components)
- Alexa skill informing about the car status: demo with per user configurations
  (via account linking) modifiable by a mobile friendly web app
  (TypeScript, ask-sdk, AWS Lambda, Firebase [Auth, DB], React)
- front-end for internal staffing tool: bugfixing and implementing new features
  (TypeScript, React, Redux, rxjs, styled-components)
- progressive web app for tracking of smart pallets with map, CRUD, search
  (TypeScript, React, Redux, rxjs, styled-components, Mapbox, AWS Amplify)

July 2015 – September 2016

brightONE Poland (Junior Software Engineer)
Technologies: C++, Python, internal tools
- analysis of problem reports concerning a voice command subsystem
  in car's infotainment
- voice dialog modelling

July 2014 – September 2014

Red Sky Sp. z o.o. (Intern)
Technologies: Python, JavaScript, MVC, SQL, ORM, HTML, CSS
- implementation of a comment system in *Domain Driven Design* methodology
- implementation of a view of recent activities of user's friends in a social website –
  added posts, comments and likes
